

DarkChild *Resources*

a division of Darkchild Projects

“Impacting One Life at a Time”

About Us

DarkChild Resources is a South African commercial and project services company focused primarily on the mining, commodities and associated services value chain. We connect corporate requirements with credible suppliers, service providers and commercial partners, while selectively investing in strategic assets where opportunities support doing so.

Our three core business areas are:

Commodity Sale & Purchase Facilitation

Heavy Mining Equipment Solutions

Bulk Commodity Haulage Solutions

Our model combines our own capabilities and selected assets with a network of trusted partners, allowing us to provide solutions without unnecessarily duplicating infrastructure already available in the market.

BULK HAULAGE SOLUTIONS

COMMODITY SALE & PURCHASE FACILITATION

DarkChild Resources facilitates transactions between credible commodity buyers and sellers, locally and internationally.

Commodities include:

- Chrome Ore & Chrome Concentrate
- Iron Ore
- Manganese
- Bulk Fuel
- Other selected bulk commodities

Our role includes:

- Commodity sourcing
- Buyer and seller identification
- Commercial negotiations
- Sale and purchase facilitation
- Offtake facilitation
- Transaction coordination
- Logistics coordination

Our focus is on bringing together credible supply, credible demand and commercially executable transactions.

HEAVY MINING EQUIPMENT SOLUTIONS

DarkChild Resources provides equipment rental and equipment sourcing solutions to contract mining companies and other mining operations. We operate a hybrid model: owning selected strategic equipment while sourcing additional machinery through established equipment partners when required.

Our Current Equipment

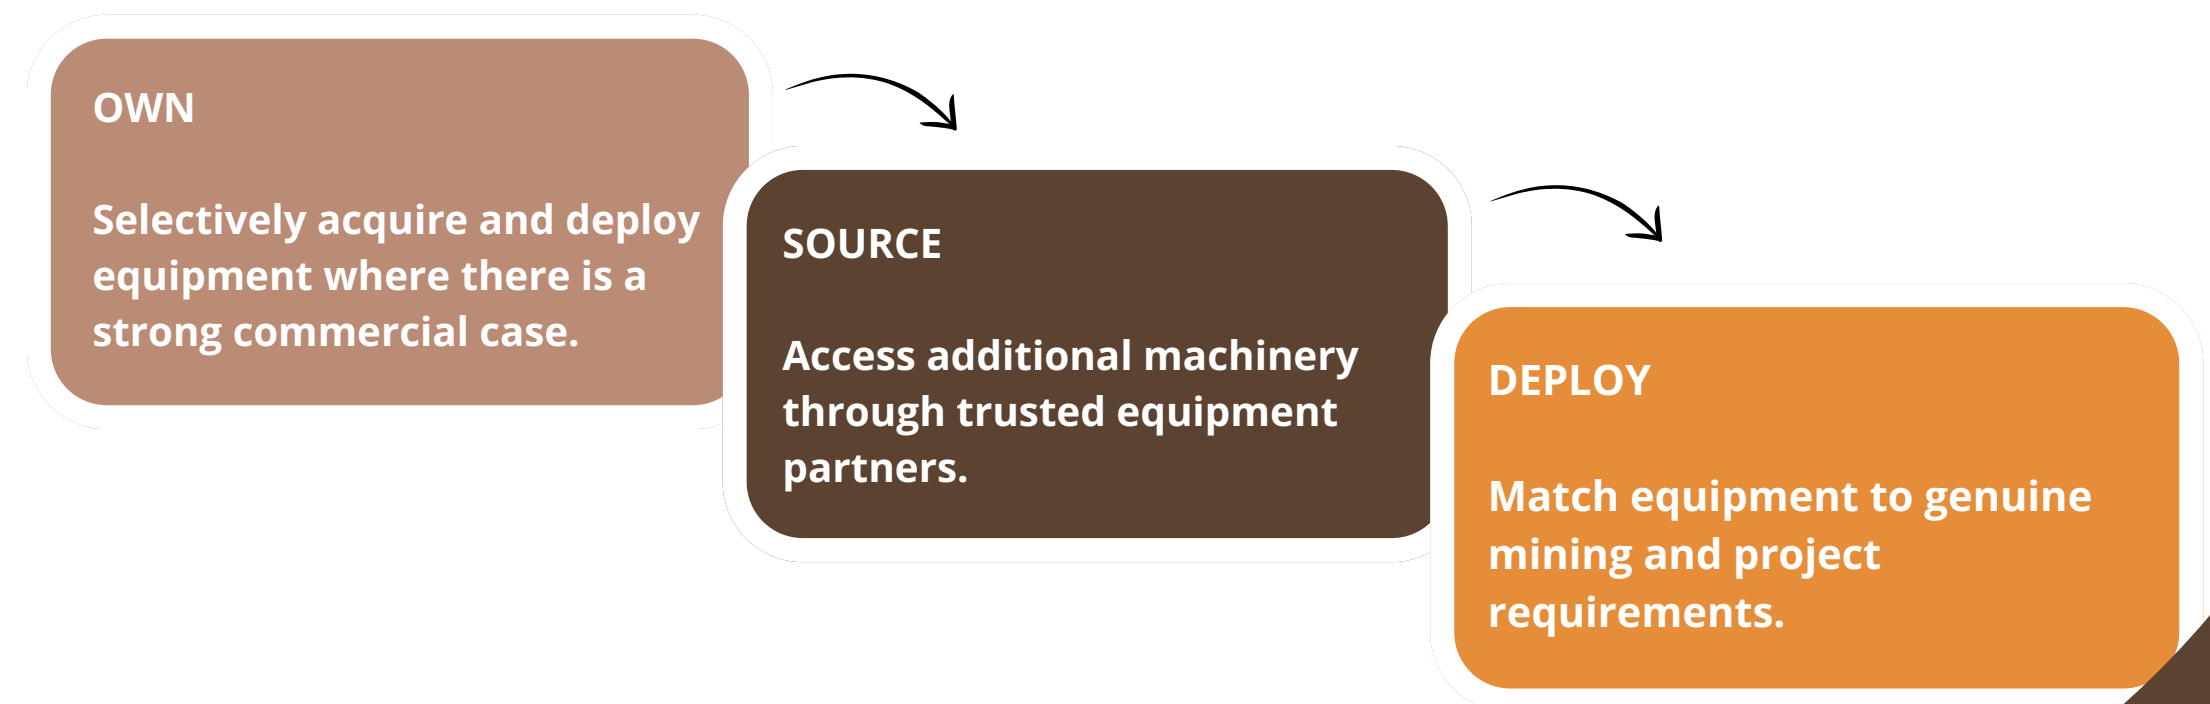

DarkChild Resources currently owns a Scalping Screener, which has been successfully deployed on rental to Berlington Mine. This represents the foundation of our strategy to selectively grow our own portfolio of productive mining equipment as suitable contracted opportunities arise.

Equipment Rental Facilitation

Where clients require equipment outside our owned fleet, DarkChild Resources works with trusted equipment owners and rental partners to source appropriate machinery.

This can include:

- Excavators
- Front-End Loaders
- Articulated Dump Trucks
- Bulldozers
- Graders
- TLBs
- Water Bowsers
- Screening and related equipment

This approach enables us to respond to broader equipment requirements without representing partner-owned machinery as our own.

BULK COMMODITY HAULAGE SOLUTIONS

DarkChild Resources provides an asset-light bulk haulage facilitation service, connecting corporate clients requiring transportation capacity with trusted transport operators seeking sustainable haulage contracts.

DarkChild Resources does not own or operate a truck fleet. Instead, our role is to develop and manage relationships between commodity producers, mining companies, traders and established transportation partners with the appropriate fleet capacity.

Our Role Includes:

- Understanding client haulage requirements
- Identifying suitable transport operators
- Matching fleet capacity to contracts
- Commercial coordination
- Rate and route facilitation
- Load allocation coordination
- Transporter relationship management
- Delivery and performance coordination

Typical Movements

- Mine → Processing Plant
- Mine → Stockpile
- Mine → Rail Siding
- Mine → Customer
- Processing Plant → Stockpile
- Stockpile → Port / Export Terminal

Our objective is to become a trusted commercial link between companies requiring dependable bulk transportation and capable transport operators requiring sustainable work.

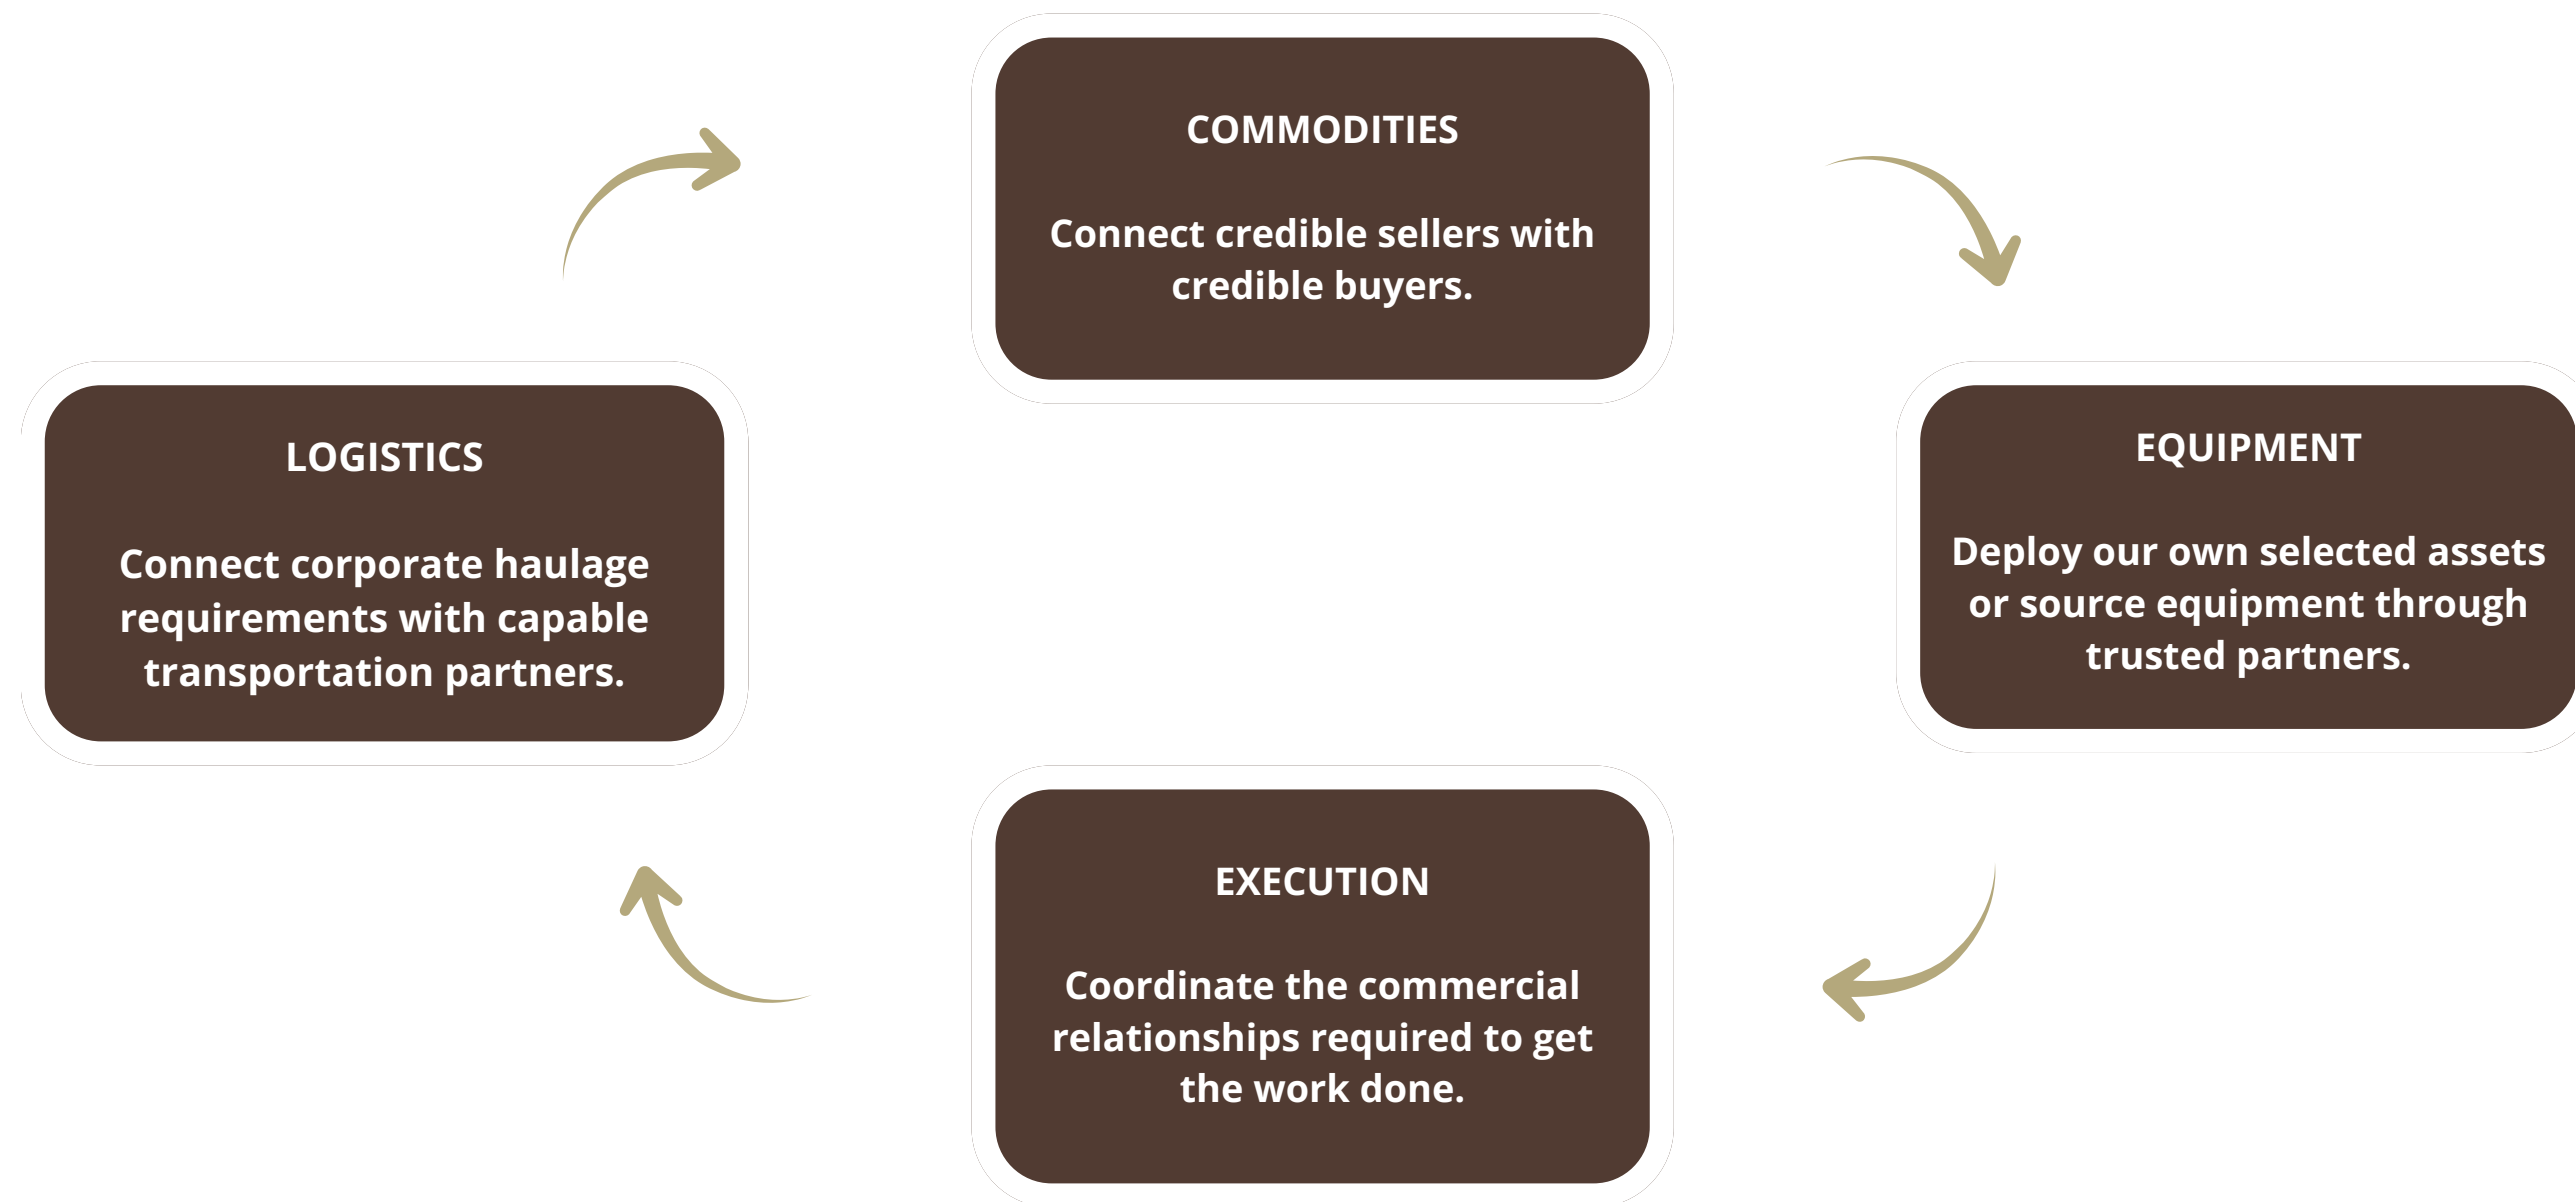

HOW OUR MODEL WORKS

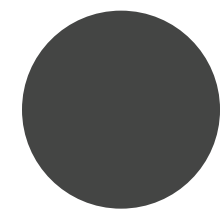

DarkChild Resources is fundamentally a commercial connector and solutions provider.

We do not believe that a company needs to own every asset in a value chain to create value.

Instead, we combine our commercial capability, relationships, selected assets and trusted partners to solve client requirements.

CONNECT. FACILITATE. EXECUTE.

WHY DARKCHILD RESOURCES

- 20+ years of entrepreneurial and commercial experience
- Strong focus on mining and commodities
- Asset-light and scalable operating model
- Established network of specialist partners
- Selective investment in strategic assets
- Practical commercial execution
- Flexible partnership approach

Our strength is not measured by the number of machines or trucks we own. It is our ability to identify a requirement, assemble the right resources and partners, structure the commercial solution and facilitate successful execution.

OUR VISION

To become a trusted commercial partner across the Southern African mining and commodities value chain by connecting opportunities, resources and capable businesses.

OUR MISSION

To identify commercial requirements, connect the right parties and resources, and facilitate solutions that create sustainable value for our clients and partners.
